

Bt7 LED

■ Features ■

Lightweight Design

The light weight backing frame is both strong and easy to handle.

Custom sprung locking handles make screen construction a single person lifting operation at just 14kg per panel.

The panel size of 500mm x 1000mm means large screens can be constructed quickly and safely.

Indoor / Outdoor

Deep contrast at 2500:1 and a high brightness of 5000nits combine to make this panel at home in any environment.

It's Ip65 protection has withstood the worst weather the British summer festival season could throw at it.

Curve Options

An innovative backing frame and locking system enable a curve of up to 15 degrees to be set during construction.

High Refresh Rates

It's high picture refresh rates give you confidence with cameras for streaming and broadcast events.

■ Introduction ■

A robust and reliable panel for all events.

The Bt7 panels have been used on everything from WWE Wrestling, to Tom Jones and the Silverstone Classic.

Corporate events for Virgin group and brands including Harley Davidson and JEEP

■ Specifications ■
